CMS is continually working to accommodate the common needs of local governmental entities in Illinois. We are now in the process of finalizing a contract for winter road abrasives. Road abrasives can be used as a supplement or an alternative to your ice melting materials such as rock salt, liquid salt or calcium chloride. This will be a statewide contract with one vendor located in each IDOT district. We will notify you when the contract is available. Also, if you still require assistance locating rock salt, please contact me and we will try and assist you.
